Art Unit: 2623

Restriction/election

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Species of extracting brightness values as reference for discriminating color pixels; (claims 1, 52, and 56);

II. Species of determining a color block by determining a ratio of the number color pixels and that of whole pixels in the block exceeds a threshold; and determining the feature of specified color in the block (claims 4, 8, 10, 11, 13, 16, 19, 20, 24)

III. Species of determining a color image by excluding or correcting a block in a certain portion of the image (claims 31 and 34)

IV. Species of extracting saturation data to determining the color pixels. *(claims 36, 40, 59)*

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 24 is generic claim for species II.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and **a listing of all claims readable thereon, including any claims subsequently added.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2623

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
